When a R.E.A.D.[®] dog is listening, the environment is transformed, a child's dread is replaced by eager anticipation, and learning occurs. The handler is a skilled facilitator, too—shifting performance pressure off the child and providing support, while the child gets the supervised reading practice necessary to build vocabulary, increase understanding of the material, and gain fluency as a reader. R.E.A.D.[®] utilizes registered therapy animals who have been trained and tested for health, safety, appropriate skills, and temperament. When these special animals come to hear children read, it's fun! And that makes all the difference.
